

CONTENTS

CHAPTER—1 : THE SCIENCE OF KARMA AND THE SCIENCE OF GENETICS 01-53

THE SCIENCE OF KARMA

- **What is *karma*?**
- **Theory of *karma* in Indian philosophies**
 - Doctrine of *karma* in Vedic philosophy
 - *Karma* theory in *upaniṣads*
 - The meaning of *karma* in *Nyāya Vaiśeṣika* philosophy
 - Interpretation of *karma* in *Gītā*
 - *Karma* defined in epics
 - Doctrine of *karma* in Buddhist philosophy
 - Doctrine of *Karma* in Western school of philosophy
 - *Karma* in *Patanjali yoga darśana*
 - Jaina doctrine of *karma*
- **Metaphysical base of theory of *karma***
 - Characteristic of the soul
 - Characteristic of matter (*pudgala*)
 - *Karma vargāṇā* (groups)
 - Principle of cause and effect of *karma*
 - Interaction of soul and *karma*
 - *Karma śarīra*
 - Role of *karma śarīra*

THE SCIENCE OF GENETICS

- **An introduction to the science of Genetics**
 - Genetics—core science of biology
 - Genetics—science of potentials
 - Basic concept of Genetics
 - The physical basis of heredity
 - The development of Genetics
 - Heredity and environment
 - Genetics—study of heredity and *genes*
 - Discovery of laws of heredity—by Gregor Mendel
 - Relation of Genetics with evolution

- **Characteristics of *genes***
 - What is *gene*?
 - *Genes*—Software of heredity
 - *Gene* action
 - The arrangement of *genes*
 - *Gene*—the constituent element in body and personality
 - *Genes*—the life motivator component
 - Products of *genes*
 - Reading of *gene* sequences
- **Characteristic of Genome**
 - Complete copy of genome
 - DNA and genome
 - Genome—Complete set of DNA
 - Heredity carrier—the *genes*
 - *Genes*—sequence of genetic code
 - Genetic code—a blue print
 - Effect of genetics and environment on human behaviour
 - What are *genes* for?
 - Modern concept in *gene*

CHAPTER—2 : LIFE IN THE SCIENCE OF *KARMA* AND GENETICS

54-108

LIFE IN THE SCIENCE OF *KARMA*

- Existence of soul
- Characteristic of living substance
- Survival of organism
- The fabric of life
- Protoplasm—living material
- Life and environment
- **Birth of life in Jainism**
 - Conception
 - Embryology
 - Kinds of conceptions
 - Birth process
 - Eighty four lac vaginas
 - The process of origin of various kinds of men
 - The mystery of birth of man, woman and eunuch
 - Process of food intake

- **Jaina view of *paryāpti* and *prāṇa***
 - *Prāṇa* (living material or life force)
 - *Prāṇa* (vitalities) and *paryāpti* (sufficiencies)
 - Respiration and energy relation
 - Six types of *paryāpties*

LIFE IN THE SCIENCE OF GENETICS

- Characteristics of *jīva* (creature/living being)
- Reproduction
- Transmission of genetic information
- Reference standards
- Inheritance of physical traits
- Sex determination
- *Genes*—hereditary factors
- **Organization of the cell**
 - Physical structure of cell
 - Function of different parts of cell
 - Cell division
 - Cell reproduction
 - The life cycle of the cell
- **Characteristics of chromosomes**
 - What is chromosome
 - Morphology of chromosomes
 - Quantity of chromosomes in some animal cells
 - *Genes* and chromosomes

CHAPTER—3 : CLASSIFICATION OF *KARMA* AND *GENES* 109-148

CLASSIFICATION OF *KARMA*

- Main Types (*mūla prakṛti*) of *karma* in Jainism
- *Ghāti* and *aghāti karma*
 - *Serve ghāti karma*
 - *Deśa ghāti karma*
 - *Aghāti karma*
- Auspicious and inauspicious *karma*
- *Darvya* and *bhāva karma*

□ **Sub Groups (*Uttaraprakṛti*) of eight main *karma***

- | | |
|-------------------------------|----------------|
| ○ <i>Jñānā varaṇa karma</i> | 5 sub groups |
| ○ <i>Darśanā varaṇa karma</i> | 9 sub groups |
| ○ <i>Vedanīya karma</i> | 2 sub groups |
| ○ <i>Mohanīya karma</i> | 28 sub groups |
| ○ <i>Āyusya karma</i> | 4 sub groups |
| ○ <i>Nāma karma</i> | 103 sub groups |
| ○ <i>Gotra karma</i> | 2 sub groups |
| ○ <i>Antarāya karma</i> | 5 sub groups |

158 sub groups

CLASSIFICATION OF *GENES*

- Types of *genes*
- Function of *genes* on all 24 chromosomes

CHAPTER—4 : BONDAGE OF KARMA AND GENETIC CODES IN DNA AND RNA

149-212

BONDAGE OF KARMA

- **Causes of bondage**
 - *Mithyātva* (false belief)
 - *Avirati* (vowelessness, non-abstinence)
 - *Pramāda* (negligence)
 - *Kaṣāya* (passions)
 - *Yoga* (activities)
 - *Kaṣāya* and yoga
 - Desires
 - Eighteen sins
 - Thirty nine activities
 - Cause of bondage of four *gatis*
 - Role of *genes* in bondage of *karma*
- **Components of bondage process**
 - *Prakṛti* (nature)
 - *Pradeśa* (quantity)
 - *Sthīti* (duration)
 - *Anubhāga* (intensity)
 - Ten states (processes) of *karma*

- ***Puṇya* and *pāpa***
 - Cause of bondage of *puṇya*
 - Cause of bondage of *pāpa*
- **Relation with bondage and *leśyā***

GENETIC CODES IN DNA AND RNA

- **DNA**
 - Cause of bondage—difference of genes.
 - Nucleic Acid
 - DNA structure
 - How DNA works
- **RNA**
 - RNA—the process of transcription
 - Messenger RNA—"the codons"
 - Transfer RNA—"the anticodons"
 - Process of translation
 - Protein synthesis
- **Genetic Codes**
 - Founders of genetic codes
 - The nucleotides
 - *Gene* action

CHAPTER—5 : FRUITION OF KARMA AND *GENE* MUTATION

213-273

FRUITION OF *KARMA*

- **Total number of fruition (rise-vipāka) of *karma***
 - Process of energy during rise of *karma*
- ***Puṇya* and *pāpa***
 - *Puṇyānubandhi puṇya*
 - *Pāpānubandhi puṇya*
 - *Pāpānubandhi pāpa*
 - *Puṇyānubandhi pāpa*
- **42 Types fruits of auspicious *karma***
- **80 Types fruits of inauspicious *karma***
- ***Puṇya* and *pāpa* in popular sense**
- **Fruition of *karma*—*saṃsāra***

GENE MUTATION

- Factors causing mutations
- Mutations in code
- *Gene* damage, mutation and repair
- Effect of *genes* over *genes*
- Mutation—changes in genetic material
- **Genes and diseases**
 - Diseases associated with chromosomes
 - Chromosome map
 - Disease of eyes
 - Disease of immune system
 - Disease of ear, nose, throat
 - Disease of nervous system
 - Alzheimer disease
 - Deafness disease
 - Epilepsy disease
 - Essential tremor disease
 - Parkinson disease
 - Wilson's disease
 - Cancer disease
 - Indian caste wise distribution of disease
 - Birth defects
 - Chromosomal abnormalities
 - Linkage of *genes* to disease
- **Role of faulty *genes* in chromosomes**
- **Role of *genes* in *karma vipāka* (rise)**

CHAPTER—6 : ERADICATION OF KARMA AND GENETIC ENGINEERING**274-331****ERADICATION OF KARMA**

- ***Samvara***
 - *Samiti* (careful activity)
 - *Gupti* (restraint of the activity)
 - *Yati dharma* (dharma of *monk*)
 - *Bhāvānas* (mental reflections)
 - *Parīṣaha* (natural sufferings)
 - *Cāritra* (conduct)

- ***Nirjarā***
 - External Austerity
 - Internal Austerity
 - Other Austerity
- ***Cāritra***
 - *Mahāvratas*
 - *Anuvratas*
- **Triple Jewels—the pathway to emancipation**

GENETIC ENGINEERING

- **Genetic Engineering and its application**
 - Role of DNA in Genetic Engineering
 - Genetic control
 - Regulation of *gene* expression
 - DNA repair and DNA "proof reading"
 - Control of enzyme activity
 - Control of cell growth and reproduction
- **Impact of Genetic Engineering**
 - DNA Finger printing
 - Recombinant DNA technology
 - General approach to clone DNA
 - Manipulation of embryos
 - Clones
 - *Gene* therapy
 - Population Genetics (The *genes* in populations)
 - Factors which influence the *gene* frequencies
- **Preventive and social measures**
 - Health and promotional measures
 - Specific protections
 - Early diagnosis and treatment
 - Prenatal diagnosis
 - Amniocentesis
 - Screening of new born infants
 - Recognizing preclinical cases
 - Rehabilitations
 - Transplantation organ and tissues
 - Immuno-genetics
 - The genetics of antibody formation
- **Comparison—*Samkramaṇa* of *karma* and genetic engineering**

CHAPTER—7 : COMPARATIVE STUDY OF THE SCIENCE OF *KARMA* AND THE SCIENCE OF THE GENETICS **332-377**

- **Corelation between *karma* and *genes***
 - Parapsychology
 - The human genome and the doctrine of *karma*
 - *Karma* play role through *genes*
 - *Genes* are because of you and not vice-versa
- **Effect of *karma* over *genes***
 - Physics and *karma*
 - *Karma* and *gene*
 - Changes in *jīva* state and the change of fate
 - Change of modes, rebirth and genetic codes
 - The scientific communistic thought of Jainism
 - Principle of *saṁkramaṇa*
- **Spirituality (combination of spirit and *karma śarīra*) and *genes***
 - The God *gene* theory
 - Self transcendence and *genes*
 - Consciousness and *genes*
- **Life and *genes***
 - Thinking (inheriting intelligence) and *genes*
 - Body weight and *genes*
 - Relationship and *genes*
- ***Karma* and genetic engineering**
- **Comparison of *karma* and *genes***

CONCLUSION **378-384**

BIBLIOGRAPHY **385-400**
